

Kaleidoscope Quilt Top

The quantity of fabric required is determined by where the fabric repeats are, as 8 are required for each block therefore

fabric with 12" repeat needs $12 \times 8 = 96'' = 2.45\text{m}$

fabric with 17.5" repeat needs $17.5 \times 8 = 140'' = 3.55\text{m}$

These quantities allow for borders as well.

Also required is

- approximately 1.1m of background fabric for 12 stars. Depending on how the blocks are set (ie. on point), you may need more fabric for setting triangles.
- brand new cutting blade (cut through 8 layers of fabric) for your cutter
- sewing machine with new needle
- general sewing notions
